To Whom It May Concern,

We have had the pleasure of working with Noacon, Inc. on several projects, most recently two Field Service Centers for Entergy Arkansas in Batesville and Mountain View, Arkansas.

Noacon's personnel in both the field and office are top notch. Their field superintendents are seasoned and are proactive in dealing with coordination issues. They are truly builders and not just construction brokers.

Their project management staff is well organized. They keep up with the paperwork end of things in a very professional manner. I believe this aspect of their work is second to none in the state, including companies of much larger size and staff. This manner of doing business keeps the team focused on issues at hand and creates an open and transparent dialogue with the team of designer, Owner and contractor.

Noacon's estimating and pricing abilities are experienced, reasonable and thorough. They have a mindset of partnering with the Owner to produce the greatest value not the highest cost.

We would not hesitate to recommend Noacon, Inc. for consideration to any Owner for either a General Contractor Bid Project or as a Construction Manager for their projects.

Sincerely,

A handwritten signature in blue ink that reads "David Porter".
